2024

Economics II

6.00 credits	45.0 h + 22.5 h	Q2

Teacher(s)	Chariot Dominique (compensates Hamaide Bertrand) ;Hamaide Bertrand ;
Language :	English
Place of the course	Bruxelles Saint-Louis

Learning outcomes	**At the end of this learning unit, the student is able to :**
	• define and explain the main macroeconomic concepts and aggregates, particularly those relating to the measurement of (changes in) economic activity and prices, employment and unemployment.
	• Explain how these concepts are constructed and measured, and what their advantages and limitations are
	• Use these concepts in application exercises
	• Carry out simple data analysis in relation to these concepts: this means being able to
	
	    • search for data relating to these concepts in a given country,
	    • manipulate and transform them using excel software
	    • present and comment on them in a relevant form in a brief report
	• Identify and explain key relationships that may exist between different macroeconomic variables
	• Use simple graphical and/or algebraic versions of macroeconomic models (such as the aggregate supply aggregate demand model or the Solow model) which formalise these relationships: this means being able to
	
	    • explain the assumptions of these models and their roles
	    • identify and discuss the results put forward by these models
	    • use them to study the consequences of shocks or macroeconomic policies
	    • use them to discuss topical issues
