Q2

Teacher(s)	Amand Arnd ;
Language :	French
Place of the course	Bruxelles Saint-Gilles
Main themes	<p>In Brussels, the teaching is cumulative and progressive, from the shell to the finishing details, while at Tournai construction and materials are taught in a global way; in this way, students can form logical groupings.</p> <p>This teaching unit describes in parallel and in a general way the main materials, elements and implementation systems used in the construction field. It introduces generally accepted rules of building, linked to the nature of the materials used.</p>
