LOGO1BA - Teaching profile

Learning outcomes

"Speech and language therapists work in the field of communication and language therapy. They intervene in disorders involving speech, the voice and oral and written language, whatever their origin, in children, adolescents, adults and elderly people." (The Permanent Liaison Committee for Speech Therapists of

the European Union, a European grouping of national professional associations in the European Union).

The programme provides the psychological, medical, linguistic and methodological foundations relevant to speech and language therapy. It develops the necessary skills to analyze the complexity of human behaviour, relationships and situations with their biological and sociocultural aspects. To be able to go on to the Master in speech and language therapy, students must :

- acquire the knowledge (medical, psychological, linguistic, sociocultural and philosophical), concepts and theories which underpin this analysis;
- develop critical analytical skills of their implications and conditions of use in patients;
- have good oral and written communication skills, including in English ;
- acquire the methodologies necessary to practise the profession.

On successful completion of this programme, each student is able to :

A. Analyser une situation (individuelle ou collective), y inclus une situation relative au langage, à la communication ou au calcul, en mettant en œuvre théories et approches pertinentes.

Course prerequisites

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified **in the detailed programme**: their title is followed by a yellow square.

Prerequisites and student's annual programme

As the prerequisite is for CU registration purposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.
