Programme structure

In addition to an in-depth study of the various disciplines in sociology, the research project is a key component of the 120 credit Master. It is therefore possible to do a research placement, either in the field of basic research or in a professional field relating to the social requirements of the different players and organizations.

The 120 credit Master in sociology contains core subjects, optional 'area' subjects and four different focuses.

- The **core subjects** (65 credits) contain subjects relating to theoretical cross-disciplinary issues (20 credits), Jacques Leclercq Chair lectures (6 credits) in which renowned lecturers present their research, qualitative or quantitative methodology (10 credits), a seminar in the practical aspects of research (7 credits) and a final piece of work (22 credits)
- **optional subjects**, grouped according to different areas of sociological analysis (e.g. work, city, religion, family, education, globalization), can be selected depending on students' training and research project (25 credits)

In addition, students may choose to acquire specific skills by choosing one of four different focuses (30 credits):
