INTP2M - Teaching profile

Learning outcomes

At the end of their training, students in interpreting will be experts in a wide and solid range of knowledge, know-how and skills which they can employ in all aspects of interpreting and thereby communicate all the nuances of a message, formed by an orator in a foreign language, in their mother tongue, French.

Therefore, at the end of their training, students will have:

- developed expertise in their working languages in the practice of interpreting;
- mastered the different interpreting techniques (consecutive and simultaneous) and become able to employ them in communicating messages in a language different to the original while respecting the orator's intentions and register;
-

4. Identify the thematic (disciplinary) knowledge necessary, complement it independently as necessary, and employ it in a relevant manner in order to ensure that an interpreting assignment is of high quality.
- 4.1. Master basic knowledge in various fields of discipline, sociolects and terminologies in both their A and C languages;

Licence en langues et littératures germaniques	If students chosen a language combination offered in the master's programme as part of their degree course	Direct access	Programme established on the basis of the student's educational background (consult Admission and Enrolment Procedures for general registration)

- the introduction of a VAE file detailing the training course, the career path and the experience acquired (knowledge, know-how, interpersonal skills);
- the presentation of the above-mentioned admission test in French and LSFB, as well as a possible interview (in French and LSFB) with the admission board.

Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum of 60 ECTS credits, or refused.

Admissibility criteria

A candidate's application will be deemed admissible if it meets all of the following criteria:

- Candidate's diploma issued by an **institution recognized by WHED** (see <https://www.whed.net/home.php>)
- Previous course of study including **at least 3 years of higher education** (equivalent to 180 European credits), leading to an undergraduate degree;
- For holders of a **degree from outside Belgium:**

1. an overall average of at least 60% (12/20) for the entire course of study completed at the home institution and giving access to this program;
- 2.

Teaching method

Strengths of the teaching approach

- **Job-focused training and learning arrangements that combine theoretical aspects with interpreting practice.**

Learning is interactive and progressive until the level required for conference interpreters is reached.

The course focuses on technological developments and the ethics of the profession.

The various internships carried out in the second year of the Master's programme provide opportunities to put into practice and optimise what has been learnt.

Several times a year, the teaching team organises simulated multilingual conferences that reproduce real working conditions.

Students are strongly encouraged to form working groups in which they can develop the collegiality and team spirit necessary for the interpreting profession.

The dissertation provides an opportunity to develop a scientific approach combined with a rigorous methodology that will be invaluable to graduates in their professional practice and continuing education.

These combined methods ensure that graduates have both cutting-edge expertise and a highly versatile profile.

- **A variety of teaching strategies**

Teaching approaches are diversified and adapted to the different skills to be developed: lectures, exercise sessions, individual work, seminars, simulations of professional situations, work placements.

This variety of situations enables knowledge to be built up and skills to be developed progressively and regularly through daily practice of the techniques essential to the interpreting profession.

LSTI has the most modern technological tools available, as well as state-of-the-art interpreting rooms equipped with simultaneous studies proclaneous
