Introduction

LOGO1BA - Teaching profile

Learning outcomes

"Speech and language therapists work in the field of communication and language therapy. They intervene in disorders involving speech, the voice and oral and written language, whatever their origin, in children, adolescents, adults and elderly people." (The Permanent Liaison Committee for Speech Therapists of

the European Union, a European grouping of national professional associations in the European Union).

The programme provides the psychological, medical, linguistic and methodological foundations relevant to speech and language therapy. It develops the necessary skills to analyze the complexity of human behaviour, relationships and situations with their biological and sociocultural aspects. To be able to go on to the Master in speech and language therapy, students must :

- acquire the knowledge (medical, psychological, linguistic, sociocultural and philosophical), concepts and theories which underpin this analysis;
- develop critical analytical skills of their implications and conditions of use in patients;
- have good oral and written communication skills, including in English ;
- acquire the methodologies necessary to practise the profession.

On successful completion of this programme, each student is able to :

A. Analyser une situation (individuelle ou collective), y inclus une situation relative au langage, à la communication ou au calcul, en mettant en œuvre théories et approches pertinentes.

A1. Maîtriser un socle de connaissances qui permettent de comprendre et d'expliquer :

- a) un individu, un groupe ou une organisation,
- b) le développement normal et pathologique du langage, de la communication et du calcul.

A2. Observer, analyser, modéliser, critiquer et interpréter de manière argumentée :

- a) une situation (individu, groupe ou organisation) en référence à des théories et résultats de recherche, méthodes et outils relevant de la psychologie.
- b) Une situation (relative au développement normal et pathologique du langage, de la communication et du calcul) en référence à des théories et résultats de recherche, méthodes et outils relevant de la logopédie et en se fondant sur des connaissances en psychologie, en médecine et en linguistique.

B. Maîtriser les connaissances, théories et outils qui sont indispensables pour élaborer un plan d'intervention, théoriquement et empiriquement justifié, mettre en œuvre ce plan, en évaluer l'efficacité afin de modifier une situation individuelle, collective ou d'ordre logopédique.

B1. Maîtriser de manière critique les connaissances :

- a) à propos des interventions visant à améliorer une situation donnée (individu, groupe ou organisation)
- b) relatives au fonctionnement normal et pathologique d'un individu sur le plan logopédique.

B2. Identifier les interventions pertinentes visant à améliorer :

- a) une situation donnée simple (individu, groupe ou organisation)
- b) une situation relative au fonctionnement pathologique d'un individu sur le plan logopédique.

C. Communiquer de façon structurée une information précise, correcte et pertinente, adaptée au contenu ainsi qu'à l'interlocuteur et intentions visés.

C1. Présenter oralement et par écrit une synthèse en l'adaptant à différents publics et aux intentions poursuivies.

C2. Structurer et présenter clairement de façon correcte, neutre, argumentée des données recueillies et conclusions.

D. Interagir efficacement avec différents acteurs impliqués dans une situation donnée.

D1. Se mettre à l'écoute d'autrui en situations d'apprentissage et en milieux professionnels.

D2. Interagir et collaborer de manière constructive avec différents acteurs impliqués dans une situation donnée et s'intégrer au sein d'une équipe et participer à sa dynamique, en situations d'apprentissage.

D3. Adopter une posture ouverte et critique et se distancier par rapport à ses propres représentations et préjugés tout en sachant transmettre son propre point de vue avec respect, en situations d'apprentissage.

E. Agir en tant qu'universitaire, de manière rigoureuse et responsable, déontologique et éthique.

E1. Maîtriser les étapes, les méthodologies et les outils de la recherche scientifique en psychologie, en sciences de l'éducation et en logopédie.

E2. Identifier l'apport et les limites de la recherche scientifique en psychologie, en sciences de l'éducation et en logopédie pour la compréhension de situations données.

E3. Penser et agir en se référant aux principes de l'éthique et de la déontologie.

F. Evaluer et développer ses connaissances, compétences et attitudes en ayant en perspective son développement personnel et professionnel.

F1. Mettre en œuvre les moyens et les opportunités pour se développer en tant que personne et futur professionnel.

F2. Mettre en œuvre les moyens et les opportunités pour développer son propre projet professionnel.

Course prerequisites

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified **in the detailed programme**: their title is followed by a yellow square.

Prerequisites and student's annual programme

As the prerequisite is for CU registration purposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.

For more information, please consult the [Academic Regulations and Procedures](#).

Prerequisites list

LANGL1842 "Anglais pour psychologues & logopèdes" has prerequisite(s) LANGL1841

- LANGL1841 - [English course for PSP11/LOGO11 students](#)

LPSP1209 "Statistique, inférence sur une ou deux variables" has prerequisite(s) LPSP1011

- LPSP1011 - [Statistics: descriptive analysis of quantitative data](#)

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

LOGO1BA - 3RD ANNUAL UNIT

o

LOGO1BA -

- For any secondary school diploma **from a European Union country**, the admission request must contain the equivalence of your diploma or, at the very least, proof of the filing of the equivalence request with the Wallonia-Brussels Federation (French Community of Belgium). For any information relating to obtaining an equivalence, please refer to [the following site](#).
- For any secondary school diploma **from a country outside the European Union**, the admission application must contain the [equivalence of your diploma](#) issued by the Wallonia-Brussels Federation (French Community of Belgium). If you have a restrictive equivalence for the programme of your choice, in addition of it, you **must** have either the [DAES](#) or a certificate of successful completion of the [examination giving access to 1st cycle studies](#) when you submit your application

Access based on validation of professional experience

Admission to undergraduate studies on the basis of accreditation of knowledge and skills obtained through professional or personal experience (Accreditation of Prior Experience)

Subject to the general requirements laid down by the authorities of the higher education institution, with the aim of admission to the undergraduate programme, the examination boards accredit the knowledge and skills that students have obtained through their professional or personal experience.

This experience must correspond to at least five years of documented activity, with years spent in higher education being partially taken into account: 60 credits are deemed equivalent to one year of experience, with a maximum of two years being counted. At the end of an assessment procedure organized by the authorities of the higher education institution, the Examination Board will decide whether a student has sufficient skills and knowledge to successfully pursue undergraduate studies.

After this assessment, the Examination Board will determine the additional courses and possible exemptions constituting the supplementary requirements for the student's admission.

Special requirements to access some programmes

- Admission to **undergraduate studies in engineering: civil engineering and architect**

Pass certificate for the [special entrance examination for undergraduate studies in engineering: civil engineering and architect](#).

Admission to these courses is always subject to students passing the special entrance examination. Contact the faculty office for the programme content and the examination arrangements.

- Admission to **undergraduate studies in veterinary medicine**

[Admission to undergraduate studies in veterinary medicine is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in physiotherapy and rehabilitation**

[Admission to undergraduate studies in physiotherapy and rehabilitation is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in psychology and education: speech and language therapy**

[Admission to undergraduate studies in psychology and education: speech and language therapy is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

- Admission to **undergraduate studies in medicine and dental science**

[Admission to undergraduate studies in medicine and dental science is governed by the Decree of 16 June 2006 regulating the number of students in certain higher education undergraduate courses \(non-residents\)](#).

Note: students wishing to enrol for a **Bachelor's degree in Medicine** or a **Bachelor's degree in dental science** must first sit an [aptitude test \(fr\)](#).

- Access to **Bachelor of Science in Business Engineering**

The Bachelor of Science in Business Engineering is a joint program organised by KU Leuven and UCLouvain Saint-Louis Bruxelles. In order to register, all candidate must first submit an application via the [KU Leuven admission platform](#). The [conditions of access](#) to this programme are specific.

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Teaching method

Le programme de bachelier en sciences psychologiques, orientation logopédie est constitué de cours magistraux accompagnés, pour certains, de travaux pratiques en individuel ou en groupe. L'accent est mis sur le caractère pluridisciplinaire de la formation (psychologie, médecine, linguistique), en veillant à respecter les standards européens de formation universitaire de 1er cycle dans le domaine de la logopédie.

Plus précisément, en première année, l'activité « outils de l'étudiant » fournit un support à la réussite et de remise à niveau en maîtrise de la langue. L'étudiant a également l'occasion de se remettre à niveau en anglais. En deuxième année, l'étudiant approfondit ses connaissances sur le langage. En troisième année, l'étudiant a l'occasion de découvrir le milieu professionnel par un stage d'observation, en faisant le lien avec les connaissances théoriques acquises.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Assessment is through written or oral examinations held during the examination sessions.

Mobility and/or Internationalisation outlook

Les étudiants de 3ème année ont la possibilité d'accomplir un séjour d'étude d'un quadrimestre à l'étranger ou en Flandre, dans une université qui organise la formation en logopédie.

Ce type de séjour permet aux étudiants de/d' :

- vivre une expérience humaine unique,
- s'immerger dans une autre culture,
- saisir une opportunité de développement personnel incomparable,
- élargir leur réseau d'amis,
- apprendre une autre langue,
- découvrir d'autres manières d'aborder les sciences psychologiques et de l'éducation,
- avoir accès à des enseignements non proposés à l'UCL,
- établir des collaborations avec des enseignants et des chercheurs étrangers,
- accéder à des universités réputées sur le plan international,
- découvrir les richesses et le patrimoine d'un autre pays, d'une autre région.

Informations pratiques sur les échanges : [Etudiants UCL en échange](#)

Possible trainings at the end of the programme

Students who gain a Bachelor's degree may go on to the Master in Speech and Language Therapy without any further conditions.

Access to the three other Masters organized by the Faculty (Psychology, Education, Family and Sexuality Studies) is also possible: the
