## LOGO2M - Information

---

## Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
"Licenciés"			
		Access based on application	
Masters			
		Access based on application	

## Holders of a non-University 2nd cycle degree

### Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

### Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum

## Specific professional rules

---

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

## Teaching method

---

Teaching is done by specialists in the field who are both researchers and clinicians. They are doctors, psychologists and speech and language therapists who generally do clinical practice in the field of their teaching and are internationally renowned researchers. Through the diversity of the initial training (medicine, psychology and speech and language therapy), students gain very different perspectives and encounter the concept of interdisciplinarity, a key element in their future work. The clinical courses are mainly clinical case studies, the most up to date clinical tools are taught and students have the opportunity to use the most common ones in their training. Certain courses are taught as case studies in hypertext format which encourages a high degree of independence. Practical work is also organized, where possible supported by assistants who do clinical practice in the relevant field. A complete year on work placement in specialist centres and reinforced by work placement seminars organized by clinician/researchers provides students with thorough training in a range of different disorders.

## Evaluation

---

***The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".***

There is an oral or written assessment of each course, depending on the lecturer. The clinical courses, the practical work and the work placements are continuously assessed and also the subject of a final written assessment.

## Mobility and/or Internationalisation outlook

---

There is an inter-university programme organized in conjunction with ULB in which each university is part of European networks. (For UCL, exchange agreements with Paris V and the University of Geneva).

This programme satisfies the recommendations of the Comité Permanent de Liaison des Orthophonistes-Logopède, a European association of professional national associations, recognized as equivalent to the Canadian Master in Speech Therapy.

## Possible trainings at the end of the programme

---

This Master gives access to the doctoral programme in psychological science or neuroscience

## Certificates

---

No university certificates are awarded for any subset of this programme
