Course prerequisites

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified in the **detailed programme**: their title is followed by a yellow square.

Prerequisites and student's annual programme

As the prerequisite is for CU registration purposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.

For more information, please consult the [Academic Regulations and Procedures](#).

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

LOGO2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Teaching method

Teaching is done by specialists in the field who are both researchers and clinicians. They are doctors, psychologists and speech and language therapists who generally do clinical practice in the field of their teaching and are internationally renowned researchers. Through the diversity of the initial training (medicine, psychology and speech and language therapy), students gain very different perspectives and encounter the concept of interdisciplinarity, a key element in their future work. The clinical courses are mainly clinical case studies, the most up to date clinical tools are taught and students have the opportunity to use the most common ones in their training. Certain courses are taught as case studies in hypertext format which encourages a high degree of independence. Practical work is also organized, where possible supported by assistants who do clinical practice in the relevant field. A complete year on work placement in specialist centres and reinforced by work placement seminars organized by clinician/researchers provides students with thorough training in a range of different disorders.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

There is an oral or written assessment of each course, depending on the lecturer. The clinical courses, the practical work and the work placements are continuously assessed and also the subject of a final written assessment.

Mobility and/or Internationalisation outlook

There is an inter-university programme organized in conjunction with ULB in which each university is part of European networks. (For UCL, exchange agreements with Paris V and the University of Geneva).

This programme satisfies the recommendations of the Comité Permanent de Liaison des Orthophonistes-Logopède, a European association of professional national associations, recognized as equivalent to the Canadian Master in Speech Therapy.

Possible trainings at the end of the programme

This Master gives access to the doctoral programme in psychological science or neuroscience

Certificates

No university certificates are awarded for any subset of this programme
