MINHIST - Information

Teaching method

The courses make use of a variety of teaching techniques and strategies (lectures, group work, individual work, seminars, reading etc.) which help students to acquire the necessary skills. Certain courses also use e-learning techniques (provision of resources and exercises, teaching devices, collective sharing and assessment of work).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

According to the type of course, there are different forms of assessment. Certain courses have traditional oral and/or written assessments (which take place in the examination periods in January, June and August/September), while seminars involve student participation throughout the semester and the assessment of individual work. Further details on the assessment method are given at the beginning of each course.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.
