Introduction

The objective of the master is to provide advanced training in the different fields of philosophy. Its aim is that students will acquire a cultivated critical mind-set, and the ability to carry out objective analyses and synopses which put the factors which must be considered when approaching a question into perspective.

Learning outcomes

The UCLouvain School of Philosophy is mindful of providing its students with a compact programme which will enable them, when it is finished, to take up the challenge of being a responsible citizen and actor in their own right within today's society.

In order to achieve that aim, students will have the following main virtues:

- the ability to examine transforming movements in modern society by applying critical thought to the phenomena embodying them;
- the ability to employ the history of thought in the area to better integrate the pioneers of contemporary society into the continuity of human experience;
- the ability to assist social actors by calling for responsibility as regards the long term issues arising from these movements;
- demonstration of the ability to adapt as well as a plan for continuing development through their capacity to cast a critical and constructive eye over their own actions.

Generally, at the end of the master, students will have acquired a cultivated critical mind-set, and the ability to perform objective analyses and synopses which put the factors which must be considered when approaching a question into perspective. These qualities will be cultivated through exercises in critical thinking and the reading of philosophical texts, and the disciplinary diversity of the subjects taught will engender the "analytical distance" which is typical of philosophy students and very much valued in the job market by different professions (diplomacy, journalism, human resource management, education, etc.).

Holders of a [Master \[60\] in Philosophy](#) will be able to function as responsible, professional actors within society who are both collaborative and creative thanks to a spirit of tolerance, dialogue and the capacity to see the big picture, open-mindedness and sensitivity to various disciplines which characterise their training.

On successful completion of this programme, each student is able to :

1. Demonstrate critical expertise of a high level in various areas, periods and branches of philosophy, interfacing with other disciplines (science, history of art, sociology, ...), ensuring the "adoption of an intention to appropriate knowledge".

1.1. Appropriate the technicalities of a range of philosophical methods and knowledge.

1.2. Interpret and develop the links between different philosophical approaches and with other disciplines (science, history of art, sociology, ...).

1.3. Make methodological choices taking the chosen philosophical approach into question.

1.4. Form a specialisation within one of the domains of philosophy.

2. Understand and deal with philosophical questions.

2.1. Analyse and determine the aspects of and issues present in the questions being dealt with.

2.2. Formulate a question in such a way that it can be answered rationally.

2.3. Identify and assess the available responses.

2.4. Take an educated and critical position in relation to the question.

3. Create and realize individual research (individual final project) implementing a rigorously scientific, methodological and critical approach in order to go deeper into a philosophical research question.

3.1. Formulate the question which will be the topic of the dissertation.

3.2. Carry out a critical review of the literature on this question, making effective, critical and appropriate use of IT and primary and secondary philosophical sources.

3.3. Implement rigorous methodological analysis approach relevant to the question.

3.4. Challenge and defend the philosophical theories which arise from that question.

3.5. Demonstrate an objective analysis and ability to summarize which allow the factors at play to be put into perspective and appropriate conclusions to be drawn.

4. Understand, analyse and discuss questions allow the philosophy, interfacing with other disciplines

6. Act as academics and critical and responsible actors demonstrating “analytical distance” based upon a philosophical approach, with a plan for their continuing education.

6.1. Progress in a professional project in accordance with a grounded academic approach (from a theoretical and methodological point of view) and characterised by “analytical distance” based upon a philosophical approach.

6.2. Independently and responsibly, within a framework, engage in and make decisions upon the context of the work and others.

6.3. Cast a critical eye over their own knowledge and competencies and independently put in place methods and opportunities to improve them as part of system of continuing development which is indispensable in order to progress in a positive way in their social and professional environment.
