Programme structure

In addition to an in-depth study of the various disciplines in sociology, the research project is a key component of the 120 credit Master. It is therefore possible to do a research placement, either in the field of basic research or in a professional field relating to the social requirements of the different players and organizations.

The 120 credit Master in sociology contains core subjects, optional 'area' subjects and four different focuses.

- The **core subjects** (65 credits) contain subjects relating to theoretical cross-disciplinary issues (20 credits), Jacques Leclercq Chair lectures (6 credits) in which renowned lecturers present their research, qualitative or quantitative methodology (10 credits), a seminar in the practical aspects of research (7 credits) and a final piece of work (22 credits)
- **optional subjects**, grouped according to different areas of sociological analysis (e.g. work, city, religion, family, education, globalization), can be selected depending on students' training and research project (25 credits)
- **research focus** relating to the development of basic research skills and involving a placement in a research centre ;
- the **research and social intervention** professional focus is designed to develop research and social intervention skills in a particular area of society such as social work, towns, education, training and work ; it involves a research and intervention placement in a body outside the academic world ;
- the **socio-anthropology of interculturality and development** professional focus is designed to develop skills in the creation, execution and assessment of development projects in an intercultural context, both in the Northern and Southern hemispheres ;
- **teaching focus** which develops teaching and training skills in the field of social sciences.
