SREL2M - Introduction

Introduction

Introduction

Whether you are religious or agnostic, you are interested in religions and the critical approach to them offered by the human sciences. Thanks to integrated courses and seminars, our programme prepares you for multidisciplinary tasks, particularly in the field of intercultural mediation and multi-religious intervention.

Your profile

You

- Wonder about the impact of religions and religiosities in our contemporary societies?
- Would you like to gain a better understanding of the forces behind religion?
- Would you like to tackle the complexity of these issues in a calm and dialogical way
- Want to think, contribute and act in this field

Your future job

- Researcher
- Journalist
- Teachers, facilitators, or more specifically, consultants in intercultural and religious mediation within companies, schools, or the youth sector.

Your programme

The Master's offers you:

- An introduction to four religious traditions (religions of the Far East, Hinduism and Buddhism, Islam, Judaism and Christianity);
- An introduction to the methods of each of the major disciplines in the human sciences (philosophy, history, law, sociology, psychology, theology, comparatism);
- A focus on religious issues in the context of highly contemporary problems;
- An opening and guidelines for developing skills in intercultural and interreligious dialogue.

SREL2M - Teaching profile

Learning outcomes

The graduate in religious sciences prepares for the challenge posed by understanding and analysing complex problems linked to religious phenomena, in accordance with a multidisciplinary approach, in order to devise and contextualize innovative social interactions.

This master programme aims to train specialists in religion, who have threefold, multi-religious, multidisciplinary and multi-contextual, abilities.

The future graduate in religious sciences will acquire the knowledge and skills necessary to become:

- an expert capable of understanding a variety of religious phenomena as carriers of meaning, and to comprehend both the internal and external contemporaneous conditions surrounding a variety of beliefs and their transformations, in an in-depth way and in respect of at least two types of belief;
- a scientist capable of carrying out a reflective analysis having recourse to a documented, multidisciplinary approach, based in science, which is cross-disciplinary and critical, in an in-depth way and in respect of at least two religious science disciplines;
- an innovator asked to call upon his knowledge in an innovative manner in order to make relevant interventions in intercultural and interreligious issues and to propose new methods of interaction which are considerate to the different socio-religious and socio-cultural fields, in an in-depth way and in at least two different contexts.

On successful completion of this programme, each student is able to :

Demonstrate in-depth and critical mastery of foundational knowledge relating to the main contemporary religious phenomena, on the one hand, and to the different disciplinary approaches to religion, on the other.

1. Demonstrate in-depth and critical mastery of foundational knowledge relating to critical interpretation of the main contemporary religious phenomena (Christianity, Judaism, Islam, Hinduism, Buddhism).

- Demonstrate a critical reading and knowledgeable interpretation of the main religious texts.
- Demonstrate critical comprehension of the historical sources.
- Provide evidence of a critical and contextualised comprehension of the main religious traditions.

2. Demonstrate a critical mastery of foundational knowledge (theories, concepts and methods of analysis) relating to different disciplinary approaches to religion from the core curriculum (anthropology, law, history, philosophy, psychology, sociology and theology).

3. Show evidence of a mastery of highly specialised knowledge concerning two religious traditions or in one of the basic disciplines in religious science, on the basis of the chosen stream (a) focus on religions (b) social anthropology in religions (c) psychology of religion (d) law and religions.

Carry out a cross-disciplinary, reflective and critical analysis of a religion/religious theme in all its complexity.

1. Demonstrate a critical understanding of the different methodological, qualitative and quantitative approaches used to analyse religions by means of the main religious science disciplines.

2. Understand the contributions provided by various disciplines and paradigms in the concrete analysis of a religion, the specific features and characteristics of each disciplinary approach and their synergies.

3. Call upon at least one disciplinary approach (specialised methodology) to religious sciences as well as the foundations of other methodologies in humanities in a relevant, in-depth and critical way in order to approach and analyse a religion.

4. Realize a comparative process, aiming to locate a religion/a theme in at least two religious traditions and two disciplines.

5. Integrate the complexity of religious phenomena into a cross-disciplinary analysis.

Create and realize original, personal research implementing a rigorously scientific, methodological and critical process in order to go deeper into a research issue in the field of religious sciences.

1. Set down and define a research issue in religious sciences, in the context of a specific discipline or involving a cross-disciplinary process.

2. Consolidate the documentary sources in religious sciences (identify, collect and select), by making active, critical and relevant use of the information tools and by questioning the validity and relevance of the sources as regards the research problem being studied.

3. Realize a critical summary of the scientific literature (in French and in English) which is relevant to this problem, making sure to contextualize the problem in relation to current knowledge.

4. Define working hypotheses and argue them.

5. Construct and implement a relevant and rigorous methodological analysis process considering the problem being studied, justifying his choices and methodologies.

- Where appropriate, construct a theoretical development, calling upon the theoretical frameworks and relevant methods of analysis, in the context of a specific discipline in the field of religious science or involving a cross-disciplinary process.
- Create and realize, where appropriate, an empirical, quantitative and/or qualitative study, calling upon the appropriate analytical tools.

6. Analyse and interpret results (data) including the criticism being argued.

7. Integrate research results into a conclusive argument in order to present a reflective and prospective process.

8. Demonstrate the critical rigour, precision and distance (both in his own work as well as the knowledge and methodologies used in it) which are essential to all work at university level.

Interact and intervene, from a religious point of view which is mindful of what is appropriate, in respect of questions/examples of social integration in intercultural and interreligious contexts.

1. Perceive and determine the appropriateness of a religious approach in respect of questions of social integration in an intercultural and interreligious context and of their preconceptions.
2. Call upon his knowledge of religious sciences in order to contribute to the analysis and debate surrounding integration questions in an intercultural and interreligious context by constructing a point of view anchored in a multi-religious, interdisciplinary and multi-contextual approach.
3. In so doing, be mindful of the problematization and responses which result in view of the angle from which the question is analysed.
4. Assert the relevance of his religious point of view and contribute to the development of responses which are relevant and based upon

The individual programme of each student depends on her former curriculum and her optional choice as regards with religion thematics and/or disciplinary approaches; A large number of varied optional courses is offered to meet the interests of each student. The Master programme requires completing a minimum of 120 credits distributed over two years, corresponding to 60 credits each one.

Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.
