Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

APHM2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum

Teaching method

This programme, specifically designed for working people, combines theoretical lectures and case studies to give a concrete understanding of problems related to public administration.

The programme attracts students from a wide variety of professional and educational backgrounds. Differences of practice and varying points of view between students and instructors and among the students themselves enhance the students' perspective in regard to the different fields related to the programme.

By means of a variety of individual and group projects, the students are invited to adopt an analytical approach to their professional practice.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

There is a variety of evaluation methods: producing individual and/or group work, written or oral examinations and completing a thesis. To obtain a grade average, the scores obtained for the different activities are weighted by their respective credits.
