

BABA1BA

BABA1BA -

Bachelor's degree (direct access to Master's degree in Anthropology, or Master's degree in Art History and Archaeology)

You have an interdisciplinary background combining human sciences (anthropology, sociology, archaeology, art history) and exact sciences (organismal biology, cellular and molecular biology, ecology, evolution, chemistry and biochemistry, physics, paleontology, earth sciences, mathematics). You have acquired field experience in archaeology and anthropology.

You have direct access to the Masters in Anthropology or History of Art and Archaeology organized by UCLouvain. Access to biology masters is still possible, but requires a preparatory module.

Programme structure

The bachelor's degree is organized into three annual blocks, combining teaching and activities in the three disciplines of biology, anthropology and archaeology.

Composed of four axes, the program includes:

1. interdisciplinary training, with a specific course on "Societies, Environments and Transitions" in block 3, and an activity integrating the three disciplines, organized each year and bringing together all students in this bachelor's degree.
2. extensive disciplinary training in :
 - biology and other earth and life sciences
 - anthropology and sociology
 - archaeology and art history
3. methodological and technical courses in all three disciplines
4. modern language training (English)

After two common years, two options are available:

- An interdisciplinary program in the third block, leading directly to the Master's degree in Anthropology or the Master's degree in Art History and Archaeology.
- A third block with a wide range of courses in biology and related disciplines, leading directly to two Masters degrees in biology, either in Biochemistry and Molecular and Cellular Biology, or in Organismal Biology and Ecology.

BABA1BA - Information

Access Requirements

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- [General access requirements](#)
- [Specific access requirements](#)
- [Access based on validation of professional experience](#)
- [Special requirements to access some programmes](#)

General access requirements

Except as otherwise provided by other specific legal provisions, admission to undergraduate courses leading to the award of a Bachelor's degree will be granted to students with one of the following qualifications :

1. A Certificate of Upper Secondary Education issued during or after the 1993-1994 academic year by an establishment offering full-time secondary education or an adult education centre in the French Community of Belgium and, as the case may be, approved if it was issued by an educational institution before 1 January 2008 or affixed with the seal of the French Community if it was issued after this date, or an equivalent certificate awarded by the Examination Board of the French Community during or after 1994;
2. A Certificate of Upper Secondary Education issued no later than the end of the 1992-1993 academic year, along with official

- For any secondary school diploma **from a European Union country**, the admission request must contain the equivalence of your

Teaching method

Throughout the Bachelor's degree course in biology, anthropology and archaeology, students are exposed to a **variety of teaching methods** adapted to different learning objectives: lectures; practical work and exercises in small groups; individual and group written work; personal preparation, etc. Some courses also use e-learning techniques (MOOC's, provision of resources and exercises, pedagogical management, sharing and collective assessment of work, etc.). Some courses also make use of **e-learning techniques** (MOOCs, provision of resources and exercises, pedagogical management, sharing and collective assessment of work).

At the end of the bachelor's program, students are invited to take part in an **internship** on an archaeological dig site in Belgium or abroad (minimum one week) and/or an internship in an institution (museum, cultural association, research laboratory, etc.) recognized by the teacher in charge of the internship. These practical experiences give students the opportunity to demonstrate a real commitment to their training. Throughout the bachelor's program, a number of **scientific excursions and trips** enable students to reinforce the knowledge acquired in the classroom.

Generally speaking, the program comprises courses given by teams of teachers, accompanied by practical work and supervision to ensure that the various aspects of learning are integrated.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Depending on the type of teaching and course, assessment may take different forms. Some courses will involve traditional oral and/or written assessments (taking place during one of the 3 examination sessions: January - June - August/September), while seminars will involve more substantial student participation and assessment of personal, individual or group work. Assessment procedures will be specified at the beginning of each course.

For the purposes of calculating the average, teaching units are given equal weight, regardless of the number of credits they carry.

Mobility and/or Internationalisation outlook

Study visits and internships are offered **as part of the Master's program**. They take place either in the second semester of the first yearly block, or in the first semester of the second yearly block.

However, from the third year block onwards, BABA1BA students can apply for funding to study at one of the many universities with which the Faculty where they will be doing their Master's degree (Faculty of Philosophy, Arts and Letters, Faculties of Science or Faculties of Economic, Social, Political and Communication Sciences) has partnership agreements in Flanders, Europe and the rest of the world.

The list of recommended destinations is available on the mobility pages of the relevant Faculty website.

In addition, under the UCLouvain - KU Leuven agreement, courses can be borrowed from KU Leuven programs on an individual basis.
