CHPL2MC - Introduction

# Introduction

## CHPL2MC - Teaching profile

## Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Plastic, Reconstruction and Aesthetic Surgery (Ministerial decree of 18.07.1979, published on 07.08.1979).

### **Programme structure**

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least six years, full-time, one year of which will be carried out abroad in a service recognised by the Faculty and by the Ministry of Public Health. The foundation course, covering two years, follows the General Surgery programme.

The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

# The programme's courses and learning outcomes

For each UCLouvain training programme, a reference framework of learning outcomes specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

CHPL2MC - Information

UCL - Université catholique de Louvain Study Programme 2024-2025 CHPL2MC: Advanced Master in Plastic, Reconstructive and Cosmetic Surgery

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

# **Specific professional rules**

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by clicking here.

## **Evaluation**

The evaluation methods comply with the regulations concerning studies and exams. More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

#### First part

Ongoing evaluation is assured by the practical training supervisor and the results are passed on to the president of the committee by means of a special form. Annual evaluation is carried out on the basis of these forms and includes assessment of effective participation in the training (both university based and organised by scientific firms ).

Exams are organised at the end of the second year of studies at the Ministry of Public Health, by the Collegium Chirurgicum. Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training course.

#### Second part

An evaluation of knowledge is organised after each year of studies by the Collegium Chirurgicum Plasticum. At the end of the programme, the candidate is subjected to an oral and written exam by the Collegium Chirurgicum Plasticum. In addition, the candidate will need to have written and published an article in a journal with peer review.

Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Plastic, Reconstruction and Aesthetic Surgery. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
