

CHPL2MC - Introduction

Introduction

CHPL2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Plastic, Reconstruction and Aesthetic Surgery (Ministerial decree of 18.07.1979, published on 07.08.1979).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least six years, full-time, one year of which will be carried out abroad in a service recognised by the Faculty and by the Ministry of Public Health. The foundation course, covering two years, follows the General Surgery programme.

The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.
