

DPIB2MC - Introduction

Introduction

Introduction

This advanced master's degree covers public property law (land use planning, urban planning, land policy instruments, state ownership, etc.) as well as the many facets of environmental law (international, European, federal and regional law, etc.) and its interactions with other branches of law, from which it borrows certain techniques (tax law, criminal law, judicial law and civil liability).

Combining in-depth reflection and the examination of practical issues, the advanced master's degree provides a concise and rigorous overall view of the fields of law which tend to converge due to the cross-disciplinary nature of ecological issues. Particular attention is paid to the interactions between regulations governing land use and urban planning and those governing environmental law.

Your profile

This programme is particularly adapted to the needs of a professional public.

Your programme

Schedules are designed to allow people with active professional lives to participate. To this end, courses are held several evenings a week (5.30 - 8.30 pm) as well as a few Saturday mornings at the Saint-Louis Bruxelles campus. Students enrolled in the master's programme are also automatically invited to conferences and seminars organised by CEDRE (Centre d'étude du droit de l'environnement) at UCLouvain Saint-Louis Bruxelles and the Faculty of Law and Criminology at UCLouvain (Louvain-la-Neuve) throughout the academic year.

General access requirements

Translated from https://www.gallilex.cfwb.be/fr/leg_res_01.php?ncda=39681&referant=I02

Art. 112. of the "Décret définissant le paysage de l'enseignement supérieur et l'organisation académique des études" :

§ 1. In accordance with the general requirements established by the academic authorities, students who have:

1. a master's degree;
2. an academic degree similar to the one mentioned in the preceding paragraph awarded by a higher education institution in the Flemish Community or the German-speaking Community, or by the Royal Military Academy, by virtue of a decision of the academic authorities and in accordance with any additional requirements they may establish;
3. a foreign academic degree deemed equivalent to the one mentioned in paragraph 1, in accordance with this Decree, a European directive, an international convention or other legislation, in accordance with the same requirements.

The additional admission requirements referred to in paragraph 2 are intended to ensure that the student has acquired the knowledge and skills required for the studies in question. When the additional admission requirements consist of one or more additional course units, these may not represent more than 60 additional credits for the student, taking into account all the credits that he or she may otherwise use for admission. These course units are part of the student's study programme.

§ 2. In accordance with the general requirements established by the academic authorities, a student who holds a title, diploma, degree or certificate of higher education, in the French Community or outside it, which does not grant him or her eligibility for admission to a specialised master's course by virtue of the preceding paragraph, may nevertheless be admitted by the jury of the course in question, in accordance with the additional requirements that it establishes, if the totality of the higher education that he or she has completed or the expertise that he or she has acquired is valued by the jury to be at least 240 credits.

§ 3. By way of derogation from these general requirements, the academic authorities may also admit to a specialised master's course holders of a title, diploma, degree or certificate awarded outside the French Community which, in that system of origin, grants direct eligibility for postgraduate studies, even if the studies sanctioned by these credentials are not organised into distinct degree courses or within a time period of at least five years.

Teaching method

Educational effectiveness is ensured by the complementary nature of several teaching methods, namely, lectures accompanied by discussions which highlight previous experience and professional backgrounds.

The teaching methods are designed to make the most of the limited time available to adult students with professional and/or family lives.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Assessments are generally carried out by means of a written or oral exam. Examinations focus not only on knowledge of the subject matter, but also on a student's ability to apply it.

In addition, students must choose from one of three seminars, accompanied by the completion of a final paper. This provides an opportunity for an in-depth study of a subject related to environmental law or public property law from a critical perspective.
