ESP2M - Introduction

Introduction

ESP2M - Teaching profile

Learning outcomes

The 120 credit programme of the Master in Public Health (ESP120) is designed for students from very different backgrounds, many of whom will already have professional experience. This Master provides a second cycle training programme, the aim of which is to enable its graduates to take up a management post (executive, assessor, expert, manager) in the different areas of public health. Public health aims to improve and prolong life through collective action to combat disease, promote a healthy environment and organize high quality medical, nursing and paramedical services accessible to all.

Course objectives

The **research focus** in public health prepares students for research in public health. Since public health is defined more by its objectives than by a theoretical framework, research in public health relates to knowledge which aims to reduce illness and maintain and promote health in the general population. The planning of studies, the collection and analysis of data and health policies and programmes are the foundation of the programme. Depending on their objectives and previous experience, students may choose to do more advanced training in epidemiology and clinical research or in health policies and systems. These two possibilities are not mutually exclusive.

The programme is also designed as much for recent bachelors or holders of a Master's degree as for health professionals who wish to improve their analytical skills. It aims to train researchers who are able to respond to health issues in Belgium or elsewhere. Participation by students from developing countries is particularly encouraged.

Although the research focus of the Master in Public Health gives direct access to the doctoral programme for qualified researchers, this degree can also lead on to employment ; graduated may supervise research on health carried out by governments, non-government organizations (NGOs), care institutions or private companies.

The **professional focus** enables students to gain university level skills combining techniques and skills for questioning, based on

- analyze complex clinical situations in situations both in and outside hospital.
- take decisions adapted to the special situation of the patient, whilst taking the priorities into consideration.
- establish a relationship of trust, partnership and help with the patient and his close family.
- initiate and encourage the updating of innovative practices in nursing.
- draw up and update procedures and protocols and adapt them to the care situation.
- make use of all the dimensions of the health system in the care situation.
- direct patients to suitable services and make sure they are monitored.
- assess the information and training needs (patients, close relations, team), respond and share knowledge with other health professionals.
- play the role of a consultant : to lead discussions and guidance activities.

identifier des actions ou des projets pour aider des personnes ou des groupes à faire des choix en santé et agir sur leur mode de vie et leur environnement.

7.1 Amener les personnes, dans le cadre d'une relation interpersonnelle ou dans un cadre collectif.

7.2 Développer des compétences réflexives et auto-régulatrices en lien avec des problématiques de santé personnelles ou collectives.

7.3 Engager des actions pouvant contribuer à la préservation ou l'amélioration de leur santé, et accompagner leur démarche, notamment en soutenant la motivation à des actions positives.

Intervenir efficacement et de résoudre des problèmes complexes dans le domaine de la Santé Publique.

Pour cela l'étudiant sera capable de participer activement

8.1 A la description des implications des choix opérés en matière d'intervention, en particulier ceux s'adressant aux déterminants de la santé, y inclus les déterminants économiques, et à la recommandation ou au choix d'une piste d'action.

8.2 A l'élaboration un plan de mise en œuvre tenant compte des contraintes du contexte, notamment sociales, économiques, légales et éthiques.

8.3 A la mise en œuvre adaptative du plan, en gérant le risque et l'incertitude inhérents au contexte réel (économiques, social, légal, éthique).

8.4. Au management au financement et à la gestion des programmes de santé, de développement des institutions ou des systèmes de soins de santé

8.5 A l'évaluation des interventions et des programmes (efficacité, équité, efficience, impact).

Inscrire son action dans un cadre institutionnel à la fois porté et contraint par les objectifs des organisations et des parties prenantes, et dans un contexte politique et économique donné.

Il aura développé des habiletés de leadership qui favorisent le développement des compétences, améliorent l'efficience et le bien-être du et dans le milieu de travail.

9.1 Contribuer au développement d'une vision commune et de valeurs essentielles pour la planification et la mise en œuvre de politiques de santé et de démarches de soins dans les collectivités

9.2. Situer son action dans une démarche stratégique

8.3 Mobiliser les personnes, les équipes, l'information et les ressources, en interdisciplinarité et en tenant compte des principes éthiques de la santé publique

9.4 Démontrer une habileté à renforcer les capacités communautaires et/ou institutionnelles par le partage des savoirs et du pouvoir.

9.5 Faire évoluer une situation, une communauté ou une organisation par des solutions innovantes et appropriées, tenant compte du contexte

Programme structure

The Master comprises :

- core subjects : 36 credits for courses and 24 credits for the dissertation, including the preparatory seminar

- two focuses :

* a research focus of 30 credits

* a professional focus of 30 credits

- option courses : for the research focus, students may either choose the two option courses for 15 credits each, or one option course for 15 credits and optional subjects from the optional subjects list to gain 30 credits ; for the professional focus, students may choose one of the four suggested option courses : Management of care institutions ; Health and patient education; Community health policies or Clinical nursing.

The option courses in Epidemiology and clinical research and Research on health services are recommended for students who choose the research focus.

The option courses in Management of care institutions, Health and patient education and Clinical nursing are recommended for students who choose the professional focus.

There is no teaching focus.

Whatever the focus or the options chosen, the programme of this master shall totalise 120 credits, spread over two years of studies each of 60 credits

Course prerequisites

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified in the **detailed programme**: their title is followed by a yellow square.

Prerequisites and student's annual programme

As the prerequisite is for CU registration purposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.

For more information, please consult the [Academic Regulations and Procedures](#).

BA de spécialisation en biotechnologies médicales et pharmaceutiques - jusque 15 crédits supplémentaires		
BA de spécialisation en gériatrie et psychogériatrie - jusque 15 crédits supplémentaires		
BA de spécialisation en imagerie médicale et radiothérapie - jusque 15 crédits supplémentaires		
BA de spécialisation en oncologie - jusque 15 crédits supplémentaires		
BA de spécialisation en pédiatrie et néonatalogie - jusque 15 crédits supplémentaires		
BA de spécialisation en santé communautaire - jusque 15 crédits supplémentaires		
BA de spécialisation en santé mentale et psychiatrie - jusque 15 crédits supplémentaires		
BA de spécialisation en soins intensifs et aide médicale urgente - jusque 15 crédits supplémentaires		
BA de spécialisation en soins péri-opératoires - jusque 15 crédits supplémentaires		
BA en agronomie, orientation agro-industries et biotechnologies - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation agronomie des régions chaudes - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation environnement - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation forêt et nature - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation systèmes alimentaires durables et locaux - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation techniques et gestion agricoles - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation techniques et gestion horticoles - crédits supplémentaires entre 15 et 30		
BA en agronomie, orientation technologie animale - crédits supplémentaires entre 15 et 30		
BA en audiologie - crédits supplémentaires entre 15 et 30		
BA en bandagisterie-orthésilogie-prothésilogie - crédits supplémentaires entre 15 et 30		
BA en diététique - crédits supplémentaires entre 15 et 30		
BA en écologie sociale - crédits supplémentaires entre 15 et 30		
BA en ergothérapie - crédits supplémentaires entre 15 et 30		

Teaching method

The programme for the Master in Public Health is designed to create the best possible conditions for the acquisition and development of professional skills for future executives in the field of health.

To this end, the following elements are key :

- learning activities centred on the **practical reality of public health** : analysis of problems, case studies, participation of professional expert, in small groups of students according to the option courses chosen
- the **connection between theory/practice** a vital component of the programme, reflected in many combined activities and teaching in subject blocks
- the possibility of adjusting the basic programme to take the **professional training project** into account. This project can also form the common theme of different assignments and form the subject of the dissertation.
- a lively exchange of ideas and debate are also encouraged in group work, sessions for exchange of techniques and integrated activities in small groups. This also encourages openness to **interdisciplinarity**.
- **acquisition of cross-disciplinary skills (analysis, argumentation, summary, transfer)** is also encouraged by an assessment approach which gives greater weight to the integrated use of knowledge than its reproduction.
- teaching is done by a team of academic staff and health experts.

There will be special use of e-learning techniques to help group work.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams. More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Special attention is paid to assessing skills, that is to say assessment of projects, performance in real situations and work related to students' professional project.

Assessment will give greater weight to the integrated use of knowledge than its reproduction.

Mobility and/or Internationalisation outlook

Le master est ouvert aux étudiants des pays en développement.

Mobilité Erasmus : les étudiants ont la possibilité de partir à l'étranger pour une partie de la formation. S'adresser au secrétariat et s'informer des conditions générales de l'Université.

Possible trainings at the end of the programme

Doctoral programmes :

Masters in Public Health may gain access to the doctorate in public health through the doctoral school in Public Health – Health and Society.

Certificates

L'école de santé publique délivre déjà, dans le cadre de la formation continue, plusieurs certificats d'université (cfr : site de l'Institut universitaire de formation continue et de l'unité des Sciences hospitalières).

A la liste actuelle s'ajouteront de nouveaux certificats construits à partir de sous ensemble du master.

A titre d'exemple sont prévus :

- un certificat en Gériatrie
- un certificat en Santé et handicap
- un certificat en Gestion hospitalière
- un certificat en Education du patient
- un certificat en Sciences et clinique infirmières
- un certificat en Economie de la santé.
