Teaching method

This program provides general training and broad exposure relative to various areas of management.

It attempts to achieve an integration of such different areas in order to obtain a global understanding of businesses and to develop decision making and implementation capacity. With this objective, the program offers, on top of lectures which help structure business knowledge, the use of case studies and problem solving exercises. In this order, team work is often relied on.

This program intends to attract a target audience highly varied in its professional background and country of origin. The confrontation of different points of view among students, professors, lecturers and external speakers enriches students' perspectives on management and economics.
