

INTR2MC - Introduction

Introduction

INTR2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Internal Medicine, (Ministerial Decree of 19.03.1979, published on 15.03.1979).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, including at least three years of foundation studies and two years of higher studies in Internal Medicine. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

Year

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.n completion of the programmeqolc583icine

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer for the public, published on the 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Internal medicine (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Second part

- the candidate must have satisfied the requirements of the first part of the degree course of specialised studies in Internal Medicine.

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

First part

Semestrial clinical evaluations : these evaluations are established (in writing) by the training supervisor of each candidate and focus on different items. The evaluations of all the candidates are reviewed during the two semestrial meetings of the ensemble of the training supervisors. Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of the training programme, the candidate will apply for an attestation proving that he has successfully accomplished a specific university training course.

Second part

Semestrial clinical evaluations : these evaluations are established (in writing) by the training supervisor of each candidate and focus on different items. The evaluations of all the candidates are reviewed during the two semestrial meetings of the ensemble of the training supervisors.

At the end of these two years of studies, each candidate will be evaluated during the course of an interview aimed at testing his in-depth knowledge of General Internal Medicine. The writing of a thesis (20-25 pages) on a sujet relating to General Internal Medicine. The instructions for the thesis are available at the secretary's office for Internal Medicine. The publication of an article on a clinical or scientific internal medicine subject or the presentation of a paper to a scientific meeting. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Internal Medicine. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
