

MSFE2MC - Introduction

Introduction

Introduction

The new Advanced Master in Teacher Education's program in teacher training (MSFE2MC) is aimed at teacher trainers. This program is jointly offered by UCLouvain and three partner Hautes écoles (EPHEC, Haute école Louvain en Hainaut and Haute école Léonard de Vinci). Each of the four partners has recognised expertise in teacher training. UCLouvain has long been involved in teacher training through the continuing education it offers to practising teachers (via the Master's programme in educational sciences, FOPA2M) and, in particular, its "teacher training" option, which trains future psycho-pedagogues.

As part of the reform of initial teacher training (FIE Decree, 2019), the training of teacher educators in teacher training programmes has been rethought. It requires this Advanced Master in Teacher Education to teach teaching units in axes 3, 4 & 6 of the decree, as well as in axis 1 for what concerns the didactic aspects of the topics to be taught by the future teacher (cf. article 48, § 1 - DFIE).

This Advanced Master (MSFE2MC) meets this requirement. Graduates of this programme will be deemed to have the CAPAES, which is the qualification required for appointment to a Haute école (cf. decree CAPAES).

Since 2002, it has contributed to the training of higher education teachers through the organisation of the CAPAES (co-organised with the CPFEB, a social promotion organisation) as well as through the organisation of its Advanced Master in teaching and learning in higher education, which aims to enable teachers and assistants from universities and colleges to carry out applied research in its field (a programme offered since 2002, and co-organised with the University of Namur since 2008).

Since 2014, UCLouvain has also been offering a university certificate in professional practice supervision, in partnership with the three Hautes écoles, partners in this programme.

Since September 2023, UCLouvain has been jointly awarding degrees with each of the partner Hautes écoles for the new Bachelor's and Master's programs in teaching for Sections 1, 2 & 3, organized within each Haute école. It also offers, with these same partners (except for Hénallux), a new university certificate in internship supervision for teachers in training (CUES - <https://uclouvain.be/fr/etudier/formation-maitres-de-stage.html>).

Your profile

This Advanced Master is offered for professionals in the field of teacher education who wish to develop new skills as teacher educators.

Your programme

The main assets of the proposed programme can be summarised as follows :

- Accompanying in-service professionals : the opportunity of being trained, in group activities organised specifically for teacher educators, and of exchanging with colleagues in the same profession.
- Analysis of one's own training practices : this allows for a dynamic of professional development, encourages feedback from the analysis of practices with a view to organising a one-day sharing of practices, based on the capstone activity of axis 1. This allows for the exchange and transfer of practices in the HE.
- Improvement of one's practices, by being able to argue for innovations and changes implemented : return and sharing of research carried out for dissertations, via a seminar or one-day seminar and the possibility of disseminating this work (oral communication, even publications)
- Possibility of organising joint work, in part with colleagues from HE
-

MSFE2MC - Teaching profile

Learning outcomes

The vision of the graduate

This 60-credit Advanced Master is designed to train teacher educators who have experience in teacher education. Designed around two axes of training, of 30 credits each, it follows the SoTL (Scholarship of Teaching and Learning) approach, placing two dimensions at the core of the training:

- A "professional practice" dimension: this aims at analysing and describing one's professional practices in teacher training, which will be at the focus of the first capstone activity (enabling the 30 credits of axis 1 to be assessed);
- A "research" dimension: this aims to gain reflective perspective on one's practices with a view to improving them. This perspective, supported by empirical data from one's own practice and grounded in scientific literature, will be achieved through the writing of a master thesis (enabling the 30 credits of axis 2 to be assessed).

On successful completion of this programme, each student is able to :

->

The competencies addressed in this Advanced Master's programme are those defined by the FIE decree (art.51):

- Mastery of the didactics of the discipline(s) concerned or of the didactics applied to these disciplines;
- Knowledge and understanding of the training environments in which one will have to work and those in which one's future students will work;
- The capacity to accompany people in a professional training situation;
- Mastery of the specificities of adults learning and pedagogy, especially for young adults;
- The capacity to participate in the design of teacher training arrangements and to implement them;
- The capacity to observe, analyse and evaluate elements of professional teaching practice with a view to advising and helping to readjust these practices, drawing in particular on the results of scientific research in education, in the didactics of subject contents, in teaching psychology, in the sociology of education and in gender studies, concerning in particular cultural diversity, socio-economic inequalities and gender ;
- The capacity to conduct, individually and with peers, a critical and rigorous analysis of one's own practices and their impact on students and their success, in particular by relying on a variety of disciplines in the humanities and social sciences, in order to regulate one's teaching from the perspective of effectiveness and equity.

All these objectives are part of an epistemological distancing and a systemic vision.

Programme structure

The programme is structured around two training axes:

1. the "analysis of practices" axis :

- A teaching unit focusing on professional development and the development of skills as a teacher educator in higher education (teaching methods specific to higher education, design of teaching and evaluation programmes for higher education, etc.)
- Two units focusing on initial and continuing teacher training (construction of teachers' professional identity, specific methodology for initial training)

General access requirements

Translated from https://www.gallilex.cfwb.be/fr/leg_res_01.php?ncda=39681&referant=l02

Art. 112. of the "Décret définissant le paysage de l'enseignement supérieur et l'organisation académique des études" :

§ 1. In accordance with the general requirements established by the academic authorities, students who have:

1. a ~~master's degree~~ ~~diplôme de~~ ~~Coml~~ ~~diploma~~, ~~h~~ ~~1~~, ~~inn~~ ~~requirements~~ ~~ref~~ ~~54~~ ~~php?ncda=39681&sr~~ ~~cert~~ ~~1~~ ~~0~~ ~~ose~~ ~~es~~.
2. an academic degree similar to the one mentioned in the preceding paragraph awarded by a higher education institution in the Flemish Community or the German-speaking Community, or by the Royal Military Academy, by virtue of a decision of the academic authorities and in accordance with any additional requirements they may establish;
3. a foreign academic degree deemed equivalent to the one mentioned in paragraph 1, in accordance with this Decree, a European directive, an international convention or other legislation, in accordance with the same requirements.

The additional admission requirements referred to in paragraph 2 are intended to ensure of academic authorities

Specific professional rules

According to the Decree of December 2, 2021, amending the Decree of February 7, 2019, defining the initial training of teachers:

"Article 48. - § 1. Members of staff, responsible in a Haute école or in an institution of higher education for social promotion, for teaching units falling under axes 3, 4, and 6 as defined in Article 19, paragraph 1, as well as for axis 1 concerning didactic aspects and targeting subjects that will be taught by future teachers, must hold a specialized master's degree, as defined in Article 15, § 1, paragraph 1, 47°, of the Paysage decree, in teacher education.

The Advanced Master in Teacher Education must be obtained within six years from the first appointment to a position for which this advanced master's degree is required. Beyond this period, the staff member cannot be appointed to the same position or to a position subject to the same requirements.

In the case of the extension or change of assignment of a staff member, the requirement to obtain the Advanced Master in Teacher Education applies only to the assignments described in the first paragraph.

§ 2. Holders of the Advanced Master in Teacher Education are deemed to hold the Certificate of Pedagogical Aptitude appropriate for Higher Education in Hautes écoles and in Higher Education for Social Promotion defined by the Decree of July 17, 2002."

Teaching method

Aiming at the professional development of teacher educators, the teaching units are designed to support the completion of the two final capstone assignments for each axis of the programme (portfolio of analysis of practice and master thesis). To this end, the classes in the teaching units will be based on the reading of key texts and will aim at the collective appropriation of theoretical frameworks, with the support of the programme's teachers and through interaction with peers.

It will therefore be a question of - from the description and analysis of their practices - to finalize a master thesis project, which will aim to improve them by carrying out applied research in their professional environment. Theoretical analysis frameworks and tools will be proposed and worked on, so that everyone can use them for its work.

In line with the SoTL approach, the output of the dissertation will be twofold: a written output, which may take the form of a research article, for example, and an oral presentation, aimed at disseminating the results of the work to other teachers in higher education, either within the institution or as part of events for the dissemination of research or practice.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

The program's summative assessment is based on the completion of two synthesis assignments (axis 1: portfolio of practice analysis; axis 2: thesis). Formative assessments during the development of these projects will be conducted within the framework of seminars associated with each axis.
