MURG2MC - Information

Access Requirements

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

- [Specific access requirements](#)

General access requirements

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Candidates' knowledge will be tested through continuous assessment by the placement supervisor and by examinations on the subjects taught. In addition, candidates must produce a piece of scientific work to present in a public class and to a national or international emergency medicine convention and/or published in a recognized scientific journal. A written and oral evaluation by an inter-university francophone jury takes place at the end of the 5th year.

When the above requirements have been fulfilled, the programme committee will award the academic qualification in emergency medicine.

This is not a substitute for recognition by the ministerial committee. It is evidence of academic and scientific training in the context of specialized training leading to the award of professional status.

Training as a specialist doctor in intensive medicine may count for three years towards the total of six years' training required to become a specialist doctor in emergency medicine.
