Learning outcomes

The Advanced Master in Development, Environment and Communities is designed to provide a specialized professional qualification in the field of development.

Its objective is the study of the development of society from an interdisciplinary perspective. It involves appreciating development processes in their environmental contexts, with emphasis on the actions of the players involved.

This programme benefits from close inter-university collaboration between the institutions which, in the context of the French-speaking Community, make particular use of this interdisciplinary approach to development and its interaction with the environment.

On successful completion of this programme, each student is able to :

1.
 - 1.1.
 - 1.2.
 - 1.3.
 - 1.4.
 - 1.5.
2.
 - 2.1.
 - 2.2.
 - 2.3.
3.
 - 3.1.
 - 3.2.
 - 3.3.

Programme structure

This programme is made up of 240 hours of class, seminars, individual exercises and work worth 45 credits, in addition to a final assignment of 15 credits (5 credits for the core subjects in the first semester and 10 credits in the centre responsible for the special subject area chosen by each student). The courses available mostly reflect the main areas of the syllabus and the research programmes of the different research centres involved. The Advanced Master lasts one year but may be spread over a maximum of two academic years.

It comprises training common to all students and a themed course in one of the partner institutions. A residential overview seminar held at the end of the programme involving all the participants and lecturers. Supervision of the dissertation is taken on by an inter-university committee.

The dissertation is done in the research team where students have done their special subject activities. The programme may be extended for up to two years for students who wish to do their dissertation based on research which requires several months of field work.

CORE COURSES [60.0]

- Mandatory
- ✂ Optional
- △ Not offered in 2024-2025
- ⊙ Not offered in 2024-2025 but offered the following year
- ⊕ Offered in 2024-2025 but not the following year
- △ ⊕ Not offered in 2024-2025 or the following year
- Activity with requisites
- 🌐 Open to incoming exchange students
- 🚫🌐 Not open to incoming exchange students

General access requirements

Translated from https://www.galilex.cfwb.be/fr/leg_res_01.php?ncda=39681&referant=l02

Art. 112. of the "Décret définissant le paysage de l'enseignement supérieur et l'organisation académique des études" :

§ 1. In accordance with the general requirements established by the academic authorities, students who have:

1. a master's degree;
2. an academic degree similar to the one mentioned in the preceding paragraph awarded by a higher education institution in the Flemish Community or the German-speaking Community, or by the Royal Military Academy, by virtue of a decision of the academic authorities and in accordance with any additional requirements they may establish;
3. a foreign academic degree deemed equivalent to the one mentioned in paragraph 1, in accordance with this Decree, a European directive, an international convention or other legislation, in accordance with the same requirements.

The additional admission requirements referred to in paragraph 2 are intended to ensure that the student has acquired the knowledge and skills required for the studies in question. When the additional admission requirements consist of one or more additional course units, these may not represent more than 60 additional credits for the student, taking into account all the credits that he or she may otherwise use for admission. These course units are part of the student's study programme.

§ 2. In accordance with the general requirements established by the academic authorities, a student who holds a title, diploma, degree or certificate of higher education, in the French Community or outside it, which does not grant him or her eligibility for admission to a specialised master's course by virtue of the preceding paragraph, may nevertheless be admitted by the jury of the course in question, in accordance with the additional requirements that it establishes, if the totality of the higher education that he or she has completed or the expertise that he or she has acquired is valued by the jury to be at least 240 credits.

§ 3. By way of derogation from these general requirements, the academic authorities may also admit to a specialised master's course holders of a title, diploma, degree or certificate awarded outside the French Community which, in that system of origin, grants direct eligibility for postgraduate studies, even if the studies sanctioned by these credentials are not organised into distinct degree courses or within a time period of at least five years.

Specific access requirements

Specific Admission Requirements

The Advanced Master in Development, Environment and Communities is designed for students from both the Northern and Southern hemisphere with, if possible, previous professional experience of or personal involvement in the issues covered by the programme.

Teaching method

More than ever in the decades to come, dealing with problems of development in societies in both Northern and Southern hemisphere will require expertise in different sectors and analysis of local realities, in all their complexity and diversity, to be combined with an ability to take an overview of the interaction between local realities and global dynamics. In this respect, the programme offers supervision by research teams which have both practical experience in the field and the desire to put their actions in the context of the challenges provided by the changes which are under way. They consider their impact on the different kinds of development of society and the living conditions of populations in an environment which is sustainable in the long term.

Students from developing countries work in groups with their colleagues from the Northern hemisphere both for general courses and seminars. The student groups are usually mixed (North-South), which encourages a valuable exchange of views for all concerned.

The special subjects cover current situations in the Northern and Southern hemispheres which are dealt with in a comparative way and which can shed light on one another: the exchange is beneficial in both directions.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#)
