Access based on validation of professional experience

Admission to undergraduate studies on the basis of accreditation of knowledge and skills obtained through professional or personal experience (Accreditation of Prior Experience)

Subject to the general requirements laid down by the authorities of the higher education institution, with the aim of admission to the undergraduate programme, the examination boards accredit the knowledge and skills that students have obtained through their professional or personal experience.

This experience must correspond to at least five years of documented activity, with years spent in higher education being partially taken into account: 60 credits are deemed equivalent to one year of experience, with a maximum of two years being counted. At the end of an assessment procedure organized by the authorities of the higher education institution, the Examination Board will decide whether a student has sufficient skills and knowledge to successfully pursue undergraduate studies.

After this assessment, the Examination Board will determine the additional courses and possible exemptions constituting the supplementary requirements for the student's admission.

Teaching method

The program is thought to support interactive participation of the students in the various theological disciplines. In first year, the seminar "Methodology of the theology" (which includes a mentoring and an obligatory tutoring) aims at an optimal coaching of the group of the students and each one in particular. During the first year, a theoretical and practical initiation with the instruments of basic work and research, for example the sources available at the Library and on the Internet, will be ensured by the professors of all the mains domains of the theology. In second and third years, the activities envisage a volume of consequent work to develop an active pedagogy initiating the student with a participative approach for the various theological disciplines.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams. More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

The evaluation will be conducted by means of the most appropriate forms of assessment decided on by the lecturers, in coherence with the objectives outlined in the course specifications. Except some activities, the courses are evaluated during the evaluation periods. Most of the exams are oral. Teaching methods are evaluated in accordance with the current University regulations (see [General regulations concerning examinations](#)). Students may also find additional information regarding the evaluation of courses in the course description. Specifically, in first year of Bachelor program, the seminar "General methodology of theology" aims to collect the complementarity of the positive theology (biblical exegesis and history), systematic theology and practical theology. Tutoring (with a teacher chosen by the student) and coaching (with a faculty assistant) complement the methodological dimension of the formation. This will be evaluated throughout the year.

In the second and third years of the Bachelor program, an overall evaluation takes place at the end in the form of a more developed paper.
