⊗ Cours spécifiques

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

Teaching method

The programme is centred on the essential elements of analytical procedures in sociology and anthropology and how they can be used more precisely in an area or a more specific social sector. Methodological procedures are introduced through qualitative and quantitative methods. The dissertation is designed to produce a piece of work which summarizes a sociological and/or anthropological question, mainly based on a critical examination of international literature on sociology and anthropology. A key dimension is critical understanding of the ways in which anthropological and sociological procedures can differ or be closely related. This examination may form the basis of an original research topic which can go on to be dealt with in the dissertation of the 120 credit Master, either in Anthropology or in Sociology.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Assessment of the teaching sessions is based on students' work and/or taking written or oral examinations.

Mobility and/or Internationalisation outlook

The programme contains many opportunities of an international nature, the most notable of which are the Jacques Leclercq Chair lectures. Each year UCL students can attend lectures given by researchers of international standing. These lecturers are given either in English or French.

Possible trainings at the end of the programme

The 60 credit Master 60 in Sociology and Anthropology provides in-depth theoretical training in the analytical procedures in anthropology and sociology. For this reason it goes well with a 120 credit Master in another field. It also naturally leads on to the 120 credit Masters in Sociology or Anthropology. Since the structure of the programmes is similar, students can gain credits from the 60 credit Master (from the subject grouping, cross-disciplinary issues, area studies or Leclercq Chair lectures). The dissertation for the 60 credit Master is not as onerous and may also serve as a starting point for a research topic to be studied in the 120 credit Master.
