Introduction

SPHM2M - Teaching profile

Learning outcomes

Teaching on political sciences and public administration aims to equip students conceptually and operationally, allowing them to identify the constraints that govern collective decision-making and to be able to act in this world rationally, effectively and fairly.

Three additional aims are pursued:

- the first relates to the development of analytical skills, critical perspective, creativity;
- the second relates to understanding our society and the events taking place today that will help shape our future;
- the third focuses on the techniques that provide access to analysis and support action.

The programme for the first year of the Master's degree [120] in Political Sciences and Public Administration includes all the courses from the Master's degree [60] in addition to a course on public finances and a course seminar on political sciences theory.

The second year is centred on the three advanced subjects relating to the three dimensions of political sciences. "Democracy and public action" provides an in-depth analysis of the political system by considering the new forms of democracy and public and political action. "Analysis and evaluation of public policies" studies the effects of the implementation of local, national or international public policies and the process via which its orientation and way of shaping reality acquire legitimacy. "Special issues in international relations" encourages students to consider topics in greater depth, such as the development of the role of the United States in the world, the conflicts or strategies of international actors. Based on case studies, these courses include a seminar section where the students are encouraged to hone their skills in the areas that most interest them.

While working on their final dissertation, students will participate in a seminar in which they learn to communicate on scientific subjects, to listen to suggestions from peers and to exercise critical judgement and an ability to make suggestions in response to their proposals.

On successful completion of this programme, each student is able to :

Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

SPHM2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.
