

STOM2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Stomatology (Ministerial Decree of 26.04.1982, published on 01.07.1982).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years : 3 years of foundation studies and 2 years of higher studies . During the first 3 years of basic training, the candidate will follow all the courses and take all the exams of the three undergraduate years in Dental Sciences. He will be exempt from doing these if he already a graduate in Dental Sciences, and will, in that case, be authorised to immediately embark on his higher study programme. Besides the theoretical activities and clinical practices, during each one of the five years, the candidate will have to present personally written scientific pieces of work either orally or in writing, before societies or in scientific reviews. All of the candidate's activities will be attested by means of his apprenticeship record report and the "ongoing" evaluation of these will take place twice a year (see below).

The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

STOM2MC Programme

Detailed programme by subject

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Specific professional rules

These studies lead to a professional title subject to specific rules or restrictions on professional accreditation or establishment.

You will find the necessary legal information by [clicking here](#).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Theoretical and practical exams of the three undergraduate years in Dental Sciences (DENT 21 , 22 et 23). "Ongoing" evaluation carried out by the practical training supervisor every six months, also taking into consideration the "savoir," the "savoir-être" and the "savoir-faire" of the candidate.

At the end of the first two years (FUS) of the foundation studies and in conformity with the Ministerial Decree of 16 March, 1999, an oral evaluation, by a jury composed of all the work experience supervisors and the members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery is carried out and involves:

- the presentation of 3 clinical cases
- the resolution and discussion of a clinical case presented by the jury
- an average score of 60% is needed and is sufficient for passing this exam ; in case of failure, the candidate is authorised to retake the exam once again within 3 months, but in August at the latest (possibly after a complement of training depending on the directives of the jury). The final evaluation is carried out by a jury composed of the university and non-university practical training supervisors, and by members of the French-speaking Ministerial Commission for the recognition of specialists in Stomatology and maxillo-facial surgery and involves :
- Theory: theoretical questions from the European Board
- Clinical studies : presentation of clinical cases personally diagnosed and treated
- Practical studies : resolution of clinical cases presented by the members of the jury
- Scientific cases : scientific pieces of work, published and/or presented before scientific societies.

Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Stomatology. This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
